To Whom It Concerns,

I would like to see the housing needs for all generations be catered for in towns and villages by ensuring developers provide supports for people when they apply for planning permission to build houses in an area. Footpaths and lighting linking an estate to a town and village should be included in the plans along with sufficient play areas for children. If planting trees is included, the trees should be native and suitable for the particular area.

I'm aware of trees planted in a development and in time these trees had to be removed as they were lifting the footpaths.

Landowners who have land with a protected view of a monument should not be allowed to plant trees which in time will obstruct the monument from the public view.

Regards,

Yours sincerely,

Cllr Kathleen Shanagher
