①

I wish to make a submission to the Roscommon Local Area Plan .

The Ballyboughan Business Park has been a huge success and Roscommon County Council should now look at expanding the Business Park and create new services.

The Council should also look at creating new roads in the area.

One road to service a new Business Park in the zoned lands to the east of the existing Business Park and a new road to link to the Fuerty road .

Route 1 option would be the best option as this road would open up new lands for businesses in the zoned area and would give a safer route to link to the Fuerty Road.

Route 2 would be less expensive but it would come with possible disadvantages for local residents on the L7110 .

It would also not service future light industrial development as the lands on this route are not

A link from the Castlerea Road to the Fuerty road would alleviate traffic through the Town and help those using the N60 Castlerea Road to travel to schools and the different Government offices in Southwest part of Roscommon Town.
