Re Proposed MA 58

Dear Sir,

We have had meetings and discussions with Mr. B Farragher regarding the above and we do not understand why our land has been singled out as scoring 2 for infrastructure requirements when previously after an extensive examination it had scored 1 for infrastructure requirements.

There is no definitive evidence in the IW submission that would justify the downgrading. There are what we consider some mild non-specific comments on infrastructure that may be required. Similar comments are made in relation to plots 6, 8 and 9 but they are not subject to any proposed downgrading.

We would ask that the designation of our lands remain at 1 as previously determined and that we be treated the same as other landowners.

John and Helen Earley.
